

DECLARATION OF CONFORMITY

CALIFORNIA PROP65

SEPTEMBER 18, 2024

California Proposition 65, also known as the Safe Drinking Water and Toxic Enforcement Act, has been in effect since 1986. Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. If the company is providing a material, part, or assembly that is added to a customer's product, the company must provide information regarding California Prop65 compliance to its business-to-business customers.

Chemicals included on the Proposition 65 list are those that are known to cause cancer, birth defects or other reproductive harm. Proposition 65 does not ban the use of any chemicals but is intended to ensure the public is informed as to its exposure to Listed Chemicals.

The list of the 900+ Prop 65 chemicals can be found at: www.oehha.ca.gov. This list is periodically updated with new chemicals and new evaluations.

Safe Harbor levels for these chemicals expired August 30, 2018, which results in more products requiring labels. The new revision also requires a specific chemical and hazard to be noted. This label does not mean the chemicals are airborne or not encapsulated, thus limiting the likelihood of exposure. These warnings may be found on individual website specification sheets and packing lists.

Max Machinery certifies, to the best of its knowledge, products comply with California Prop65. We will continue to work with our suppliers to identify any potential use of materials as specified in the Directives and ensure this compliance statement remains accurate. We reserve the right to amend this statement at any time based on subsequent developments or information.
